

## ***Project Description***

<b>Owner</b>	<b><i>Peace River Coal</i></b>
<b>Location</b>	<b><i>Tumbler Ridge, British Columbia</i></b>
<b>Project Dates</b>	<b><i>2004 – 2006</i></b>

This project is an open pit metallurgical mine located west of Tumbler Ridge, British Columbia. The mine was originally opened as a small mine and the property was known as the Trend Mine. Nemi mine produces various grades of coal, which are exported via CN Rail. Development of the site included upgrades to existing and construction of new roads, bridges, large sediment ponds, and instream mitigation/compensation measures.

## ***Our Role in the Project***

- Construction Environmental Planning (CEMP) and Environmental Monitoring of mine and access development.
- Water quality monitoring, aquatic life, invertebrate and sediment assessments (preconstruction and operational).
