

Prince Rupert Gas Transmission Project

Aquatic & Terrestrial Science • Environmental Assessment • Geoscience • GIS

Project Location: Northern British Columbia
Owner: Progress Energy Canada Ltd.
Dates: 2013 – Present

TransCanada was selected by Progress Energy Canada Ltd. to design, build, own and operate an approximately 750-kilometre long natural gas pipeline in northern British Columbia. If approved, the Prince Rupert Gas Transmission Project will deliver natural gas from a point near the District of Hudson's Hope to the proposed Pacific Northwest LNG facility on Lelu Island, within the District of Port Edward. In May 2013, a Project Description was submitted to the British Columbia Environmental Assessment Office (EAO) and the Canadian Environmental Assessment Agency. It describes how the project team plans to design, construct and operate the pipeline, metering stations and compressor stations.

Our Role in the Project:

- Terrestrial ecosystem mapping
- Baseline environmental assessments including:
 - Vegetation and rare plant surveys
 - Fish and fish habitat assessments
 - Wetland assessments
 - Bird nest clearing surveys and assessments
