

## Intermediate or Senior Hydrologist

(any office location)

### Down to Earth Biology

EDI is an employee owned company that has been in business for 24 years with offices across western and northern Canada. EDI provides science-based environmental consulting services and products to all major industrial sectors, First Nations, and government. EDI is looking for a Hydrologist to add to our water resources team. Why is EDI right for you?

- EDI's core focus is Aquatic and Terrestrial Biology.
- We believe that one of our greatest successes is our unique company structure, one which has fostered a terrific team environment and a very high level of employee retention.
- We operate on the core principles of quality and innovation, open communication, mutual respect, and safe work environment.
- EDI is committed to the long-term development of our people, we provide a professional development budget and support people to pursue projects that are of interest to them.
- We offer competitive compensation including benefits, a profit share program and share investment offerings.
- Visit our website at [www.edynamics.com](http://www.edynamics.com) to learn more about us.

Our scientists are responsible for a diverse array of projects, working with their science-based team and developing client targeted business opportunities. If you have a hydrology background, experience in project management and a proven track record of delivering effective results, you could be the person we are looking for.

As a member of our team, you will be responsible for field data collection, data management and analysis, report writing and review, project management, business development and client communication. Our ideal candidate has in-depth experience in hydrology in western and northern Canada, with strengths in hydrologic analysis, hydrologic modeling, open channel hydraulics and the regulatory environment.

#### Requirements:

- Degree, preferably at the Masters level in Earth Sciences, Physical Geography, Forestry, or Engineering (Hydrotechnical, Civil, Environmental, Natural Resources)
- Registration (or eligibility) with APEGBC, APEGA, APEGS, Engineers Yukon or P.Geo.
- Have 5+ years of experience practicing as a hydrologist, preferably in a consulting environment
- Strong technical background in hydrologic analysis, open channel hydraulics, hydrodynamic modeling, watershed modeling, and/or cold regions hydrology
- Experience with ungauged watershed hydrology and water management plans
- Working knowledge of fisheries biology and instream flow modeling considered an asset
- Working knowledge of hydrometric data management software considered an asset
- Knowledge of hydrometric field techniques and hydrometric network design
- A strong interest in leading others within a team environment
- Manage and apply technical expertise on diverse projects, including an interest in using hydrologic data to support fisheries-focused projects
- Excellent communications skills, interact with clients, build new relationships and strengthening existing ones

If you are ready for new challenges and a rewarding career experience, please email your resume in confidence by April 30, 2018 to: [employment@edynamics.com](mailto:employment@edynamics.com) HYD0430 in the subject line.

Applicants will be considered as their resumes are received and may be requested for an interview prior to the closing date. Only candidates requested for personal interviews will be contacted. Should an individual with the required qualifications not be available, applicants with closely related qualifications may be considered. As a result, the position may be reclassified and offered without reposting.
