

## Down to Earth Biology

We are searching for a new member to join our team of professionals. Our successful candidate has outstanding technical, client service and interpersonal skills. As an Intermediate Biologist/Environmental Monitor, you will be responsible for field data collection, data analysis/interpretation, report writing and communication with clients and other stakeholders. You will be responsible for monitoring construction activities and providing clients and their contractors with environmentally sound guidance. If you are a self-starter eager for the opportunity to enhance your skills, this position is the next step in your career.

EDI works as one company of over 80 staff across western and northern Canada. We are committed to developing our staff members' areas of interest to optimize the combined success of our dynamic team.

### Requirements:

- A minimum of 5 years' environmental consulting experience and B.Sc. degree in biological/environmental sciences.
- Registration or eligibility for registration as R.P.Bio., P.Biol. or P.Ag.
- Experience in environmental impact assessments and environmental field surveys (e.g., soil, vegetation, fisheries, wetland, and/or wildlife surveys)
- Experience in environmental construction monitoring and implementation of best management practices and mitigation measures
- A working knowledge of regulatory processes in Saskatchewan.
- Experience within the oil and gas, power, and/or construction industries
- A proven record of professional report writing
- Self-motivation and the ability to thrive in a fast-paced environment
- Able to travel for field work in remote locations and/or between our offices

### Responsibilities will include:

- Environmental, terrestrial, and riparian assessments.
- Environmental permitting applications and agency liaison.
- Environmental management and monitoring of construction projects, bird nest surveys and participation in various projects led by others and involving field studies and data collection.
- Technical report writing including environmental assessments, environmental management plans, permit applications, and environmental monitoring reports

EDI is currently in its 24<sup>th</sup> year of business and operates on core principles of quality and innovation, open communication, mutual respect, and safe work environment. If you are ready for a challenging and rewarding career experience, please email your resume to: [employment@edynamics.com](mailto:employment@edynamics.com) with SK0415 in the subject line. Applications will be considered as soon as they are received until March 16<sup>th</sup> 2018.

Applicants will be considered as their resumes are received and may be requested for an interview prior to the closing date. Only candidates requested for personal interviews will be contacted. Should an individual with the required qualifications not be available, applicants with closely related qualifications may be considered. As a result, the position may be reclassified and offered without reposting.
