

Biologist - Permanent Full-time Position

Prince George, BC (other locations considered)

Down to Earth Biology

Since starting EDI 26 years ago, extraordinary people have joined our outstanding team — people who are making a difference and helping EDI thrive. Our culture focuses on teamwork, positive attitudes, and flexibility to adapt to dynamic situations. We promote innovation at all levels. Our members are self-motivated, demonstrate enthusiasm for continual improvement and possess strong communication skills. We work together as a team to achieve goals, realize career successes, and to be part of something special. Through relationships built among team members, we realize that EDI is not just a company, it is our company.

Our benefits include:

- A challenging, dynamic, engaging and rewarding work experience
- Competitive compensation, including share ownership opportunities
- Working with a team of established industry leaders who excel in the fields of Aquatic and Terrestrial Biology
- Commitment to long-term development of our people through opportunities and support for their professional advancement (e.g., internal mentorship, annual professional development budget)

This is a permanent full-time opportunity for the position of Biologist in our Prince George office; other EDI office locations may be considered. If you have experience with environmental effects assessments, project management, supervision and mentorship, with a proven track record of delivering effective results, you could be the person we are looking for. A background in biology (e.g., fish and fish habitat, hydrology, soil science, vegetation ecology, wildlife habitat, Terrestrial Ecosystem Mapping, wetland ecology, and/or reclamation) is required.

The successful candidate will be responsible for the following:

- Organizing and leading a team, including contractors, through project execution
- Managing and meeting client expectations while mitigating project risk
- Time management and budget control
- Developing project scope and cost estimation
- Business development through client relationships

What we are looking for?

- Strong organization and interpersonal skills with exceptional time management skills
- Professional report writing and senior editorial and technical review skills
- The ability to work in a dynamic environment with limited supervision
- Ability to handle the demands of deadlines and shifting priorities
- Demonstrate mentorship and supervision to junior/intermediate staff
- Strong attention to detail and accuracy, coupled with enthusiasm for continual improvement
- Comfortable with field work in remote locations and/or travel between office

Job Requirements:

- Previous environmental consulting experience that demonstrates:
 - Technical expertise in either terrestrial or aquatic effects assessment, environmental field surveys and study design
 - In depth understanding of key provincial and federal legislation regulating industrial projects, best management practices, and practicable mitigation measures
- Bachelor's Degree in a related discipline and a minimum 5 years of related experience or a comparable combination of education and experience
- A professional designation (e.g., R.P.Bio., P.Biol., P.Geo., P.Eng., P.Chem.) recognized in BC or Alberta
- Demonstrated experience of project management, client liaison, and effective management of field staff and contractors
