

Senior Biologist(s) - Permanent Full-time Position

Whitehorse, YT, - Calgary, AB (other locations considered)

Down to Earth Biology

Since we started EDI 26 years ago, our team members have defined our culture and have been instrumental in our success. As we continue to grow, we are looking for people who want to make a difference by helping others and the environment.

Our benefits include:

- A challenging, dynamic, engaging and rewarding work experience
- Competitive compensation, including opportunities for company share ownership
- Working with a team of established industry leaders who excel in the fields of Aquatic and Terrestrial Biology
- Commitment to long-term development of our people through opportunities and support for their professional advancement

How will you contribute to the team?

Our biologists are responsible for a diverse array of projects, working with science-based teams and developing client targeted business opportunities.

As a member of our team, you will be responsible for project design and coordination, coordinating field data collection, report writing and communication with clients. Our ideal candidate has in-depth experience in wildlife biology in Canada, with strengths in species-specific surveys, technical writing skills, habitat modelling, environmental assessment and the regulatory environment. Preference will be given to candidates with strong technical writing abilities.

We are looking for two candidates for our Whitehorse and Calgary office, but candidates with preferences for other locations will also be considered.

What are we looking for?

- Broad knowledge of terrestrial disciplines (e.g., wildlife, vegetation, wetlands) as well as specialized expertise in one or more discipline areas (e.g., caribou, grizzly bears, furbearers, birds)
- Ability to lead one or more wildlife survey techniques, including aerial ungulate surveys, raptor surveys, breeding bird surveys, telemetry tracking, live trapping or eDNA surveys, including familiarity with relevant provincial standards
- Strong understanding of and ideally, hands-on abilities with analytical skills including study design, statistical analysis, habitat modelling, population estimation and modelling, and animal movement metrics
- A strong foundation in wildlife habitat assessment, including vegetation identification, species-habitat associations, habitat modelling, and familiarity with vegetation spatial data, such as Vegetation Resource Inventory and Terrestrial Ecosystem mapping
- A proven record of professional report writing
- Ability to apply science-based information to find solutions to environmental management issues
- Experience in various sectors such as oil & gas, transportation, mining, renewable energy and/or urban development
- Project coordination and client liaison experience
- Working knowledge of provincial/territorial and federal regulatory requirements and processes
- Strong organizational, interpersonal, and time management skills
- Ability to work well independently and in a team-oriented environment
- Interest in providing mentorship and junior staff support/supervision
- Comfortable with occasional field work in remote locations and/or travel between offices

We are looking for a driven individual who is ready to take their career to the next level and grow with us.
