

Intermediate Aquatic Biologist Permanent Full-time Position

Saskatoon, SK or Calgary, AB (other locations considered)

Down to Earth Biology

Since we started EDI 26 years ago, our people have defined our culture and have been instrumental in our success. As we continue to grow, we look for team members who want to grow their careers and make a difference by working with our senior leaders. Our culture focuses on quality, support, mentoring, teamwork, positive attitudes, and flexibility to “do it right” for our clients. We promote innovation at all levels. Our members are self-motivated, enthusiastic for continual improvement and strong communicators. Through relationships built among team members, we realize that EDI is not just a company, it is *our* company.

Our benefits include:

- A challenging, dynamic, engaging and rewarding career experience
- Competitive compensation, including health benefits, profit-sharing and employee share ownership programs
- Working with a team of established market sector consultants who excel in their fields of science, environmental assessment and regulatory planning
- A corporate commitment to long-term career and personal development through opportunities and support for professional advancement (e.g., internal mentorship, annual professional development budget)

Our biologists are responsible for a diverse array of projects, working with their science-based team and developing client targeted business opportunities. If you have a background in Aquatic Biology, Environmental Sciences, or a related field, with a proven track record of delivering effective results, you could be the person we are looking for.

This is a permanent full-time opportunity for Intermediate Aquatic Biologist in our Calgary or Saskatoon office. Our ideal candidate has in-depth experience in aquatic biology in western Canada, with strengths in fisheries science, habitat off-setting, effects assessment and the regulatory environment.

The successful candidate will be responsible for the following:

- Design, plan and/or lead aquatic baseline field programs, aquatic health assessments, fish and fish habitat assessments, fish salvages and/or water quality field programs
- Provide technical guidance and direction to junior field staff through supervision, mentoring, and training
- Prepare permit applications and develop technical reports, including environmental assessments and habitat offsetting plans
- Analyze and interpret data and prepare technical reports, memos and other project deliverables
- Assist with the preparation of project budgets and proposals
- Work effectively in a team environment to meet goals of the project productively and safely

We are looking for someone with:

- A thorough knowledge of regulatory processes in Alberta and/or Saskatchewan
- A thorough understanding of biological survey techniques
- Flexible and adaptable in identifying and mitigating environmental issues and risks during assessment and construction phases of projects
