

# Intermediate Reclamation Specialist

## Permanent, Full-time Position

Saskatoon, SK (other locations considered)

## Down to Earth Biology

Since we started EDI 26 years ago, our people have defined our culture and have been instrumental in our success. As we continue to grow, we look for team members who want to grow their careers and make a difference by working with our senior leaders. Our culture focuses on quality, support, mentoring, teamwork, positive attitudes, and flexibility to “do it right” for our clients. We promote innovation at all levels. Our members are self-motivated, enthusiastic for continual improvement and strong communicators. Through relationships built among team members, we realize that EDI is not just a company, it is *our* company.

### Our benefits include:

- A challenging, dynamic, engaging and rewarding career experience
- Competitive compensation, including health benefits, profit-sharing and employee share ownership programs
- Working with a team of established market sector consultants who excel in their fields of science, environmental assessment and regulatory planning
- A corporate commitment to long-term career and personal development through opportunities and support for professional advancement (e.g., internal mentorship, annual professional development budget)

### About this opportunity:

Our biologists are responsible for a diverse array of projects, working with their science-based team and developing client targeted business opportunities. If you have a background in Reclamation, Environmental Sciences, or a related field, with a proven track record of delivering effective results, you could be the person we are looking for.

This is a permanent full-time opportunity for Intermediate Reclamation Specialist in our Saskatoon office. Our ideal candidate has demonstrated experience and knowledge of reclamation techniques in western Canada. The ideal candidate will have developed strengths in soil science (including erosion and sediment control, metals analysis) and vegetation assessments (including vegetation management) and hold technical proficiency and working knowledge of the oil and gas and/or mining industries and their associated provincial regulatory requirements. Additional/peripheral skills pertaining to spatial and statistical analysis would be an asset.

### The successful candidate will be responsible for:

- Designing, planning and/or leading reclamation assessments, completing Phase I Environmental Site Assessments, Detailed Site Assessments, and Acknowledgement of Reclamation (AOR) applications (based on Saskatchewan protocols)
- Preparing erosion and sediment control plans and reclamation plans for oil and gas, linear development, and mining projects
- Providing technical guidance and direction to junior field staff through supervision, mentoring, and training
- Analyzing and interpreting data and preparing technical reports, memos and other project deliverables
- Working effectively in a team environment to meet goals of the project productively and safely

# Intermediate Reclamation Specialist Permanent, Full-time Position

Saskatoon, SK (other locations considered)

## Down to Earth Biology

### We are looking for someone with:

- Comprehensive experience with recommending and implementing reclamation techniques in various land types and terrestrial and aquatic ecosystems
- Working knowledge of the Saskatchewan AOR requirements
- A thorough knowledge of regulatory processes in Saskatchewan
- Knowledge of the agricultural, oil and gas, and/or mining industries
- Flexible and adaptable in identifying and mitigating environmental issues and risks during assessment and construction phases of projects
- A proven record in completing field work productively and safely
- Strong organizational and interpersonal skills and exceptional time management skills
- The ability to work in a dynamic, team-oriented environment with limited supervision
- Strong analytical, problem-solving, and decision-making abilities
- Willingness to travel for field work in remote locations and/or between offices

### Job requirements includes:

- A minimum of 10 years of field experience specifically related to reclamation practices, as well as soil science or range management/vegetation ecology
- Strong organizational, interpersonal and time management skills
- Registration or eligibility for P.Ag. or other equivalent designation with the Saskatchewan Institute of Agrologists
- Minimum B.Sc. degree or technical diploma
- Class 5 driver's license

### **Application deadline: September 30, 2021**

*At EDI, we are committed to providing an environment of mutual respect where equal employment opportunities are available to all applicants and teammates. EDI believes that diversity and inclusion among our teammates is critical to our success as a growing environmental company, and we seek to recruit, develop and retain talented people from a diverse candidate pool.*

*If you are ready for new challenges and a rewarding career experience, please email your resume and cover letter in confidence: [employment@edynamics.com](mailto:employment@edynamics.com) with **EDI2021-028** in the subject line. Only candidates requested for personal interviews will be contacted.*
