

Fish Biologist

Permanent, Full-time Position

Whitehorse, YT

Down to Earth Biology

Since we started EDI over 27 years ago, our people have defined our culture and have been instrumental in our success. As we continue to grow, we look for team members who want to make a difference by helping people and the environment. Our culture focuses on teamwork, a positive attitude, and adaptability to dynamic situations. We promote innovation at all levels. Our members are self-motivated, enthusiastic for continual improvement and effective communicators. With clearly defined company vision, core purpose, values and a succession plan, employees realize that EDI is not just a company, it is *their* company.

Our benefits include:

- Competitive compensation, including health benefits, profit-sharing and employee share ownership programs
- A commitment to long-term development through opportunities and support for professional advancement (e.g., internal mentorship, annual professional development budget)
- Working with a team of established industry leaders who excel in the fields of aquatic and terrestrial biology
- A challenging, dynamic, engaging and rewarding work experience

We are looking for a driven individual who is ready to take their career to the next level and grow with us. The successful candidate will be responsible for:

- Planning and leading fieldwork related to fish and fish habitat
- Analyzing and interpreting data and preparing technical reports, memos and other project deliverables
- Assisting with the preparation of project budgets and proposals
- Preparing and supporting our clients with project assessment (*Yukon Environmental and Socio-economic Assessment Act - YESAA*) and permitting (*Fisheries Act*) of their projects
- Data analysis and reporting
- Working effectively in a team environment to meet goals of the project productively and safely

Job requirements includes:

- A passion for your career and a desire for life-long learning
- B.Sc. or M.Sc. degree in biology or related discipline(s)
- A minimum of 5 years of experience in a fish biology related discipline
- Proven record of study design, data analysis, reporting, environmental assessment and permitting of projects
- Strong organizational, interpersonal and time management skills
- The aptitude for working collaboratively and effectively with junior and senior staff of multiple disciplines, within teams on various projects of differing complexity, and with environmental subconsultants and government agencies
- The ability to communicate complexities in straight-forward and understandable ways
- The ability to work within a team in a dynamic environment with limited supervision
- Maintain full COVID vaccination passport/documentation
- Registration or eligibility for registration as a R.P. Bio or P. Biol.

At EDI, we are committed to providing an environment of mutual respect where equal employment opportunities are available to all applicants and team members. EDI believes that diversity and inclusion among our team members is critical to our success as a growing environmental company, and we seek to recruit, develop and retain talented people from a diverse candidate pool.
