

Senior or Intermediate Aquatic Biologist Permanent, Full-time Position

Nanaimo, BC (Other locations considered)

Down to Earth Biology

Since we started EDI 29 years ago, our people have defined our culture and have been instrumental in our success. As we continue to grow, we look for team members who want to grow their careers and make a difference. Our culture focuses on quality, support, mentoring, teamwork, positive attitudes, and flexibility to "do it right" for our clients. We promote innovation at all levels. Our members are self-motivated, enthusiastic for continual improvement and strong communicators. Through relationships built among team members, we realize that EDI is not just a company, it is *our* company.

Our benefits include:

- A challenging, dynamic, engaging and rewarding career experience
- Competitive compensation, including health benefits, profit-sharing and employee share ownership programs
- Working with a team of established consultants who excel in their fields of science, environmental assessment and regulatory planning
- A corporate commitment to long-term career and personal development through opportunities and support for professional advancement (e.g., internal mentorship, annual professional development budget)

We have an opening for a R.P. Bio or P. Bio. with a minimum of five years of experience in biological services within British Columbia. The successful applicant will have a thorough knowledge of local environmental regulations and their application to a wide variety of projects in industry.

This is a permanent full-time opportunity for Senior or Intermediate Aquatic Biologist in our Nanaimo office. Our ideal candidate has in-depth experience in aquatic biology in western Canada, with strengths in fisheries science, riparian assessments, habitat off-setting, habitat restoration, effects assessment and the regulatory environment.

The successful candidate will be responsible for:

- Design, plan and/or lead watercourse and riparian assessments, aquatic baseline field programs, fish and fish habitat assessments, fish salvages and/or water quality field programs
- Environmental management duties for new construction projects and existing developments
- Provide technical guidance and direction to junior field staff through supervision, mentoring, and training
- Project management and client liaison
- Prepare permit applications and develop technical reports, including environmental assessments and habitat offsetting plans
- Analyze and interpret data and prepare technical reports, memos and other project deliverables
- Assist with the preparation of project budgets and proposals
- Work effectively in a team environment to meet goals of the project productively and safely

We are looking for someone with:

- A thorough knowledge of regulatory processes in British Columbia
