

Down to Earth Biology

Join EDI on our journey that spans over 29 years. Our remarkable team members have been the cornerstone of our success, shaping our culture and propelling us forward. As we embark on a path of continued growth, we eagerly seek exceptional individuals who possess passion to effect meaningful change, both for people and the environment. Our dynamic culture thrives on collaboration, a shared positive attitude, and adaptability in the face of ever-evolving challenges. We foster a culture of innovation, empowering every team member to unleash their creative prowess at every level. Our workforce is driven by self-motivation, an insatiable thirst for continuous improvement, and exceptional communication skills. Together, we forge powerful connections that exceed the traditional notion of a company. Join us and be part of a team that is redefining what it means to make a lasting impact.

Our benefits include:

- A challenging, dynamic, engaging and rewarding career experience
- Competitive wages
- Working with a team of established market sector consultants who excel in their fields of science, environmental assessment and regulatory planning

We are looking for a driven individual who is ready to take their career to the next level and grow with us. Although this is a term position, there is potential for a full-time position to become available.

The successful candidate will be responsible for the following:

- Conduct/ assist with various field surveys including aquatic or terrestrial components of baseline inventories, effects assessments and/or environmental monitoring, as appropriate
- Assist with stream flow measurements, water quality sampling, datalogger and meteorological station maintenance and installation of hydrometric stations
- Conduct post-construction wildlife monitoring surveys
- Conduct/assist with data entry, analysis and technical reporting
- Support other staff/projects within EDI
- Participate proactively in EDI's health and safety program

We are looking for someone with:

- The desire to grow their career in an established, employee-owned company
- Strong organizational, interpersonal and time management skills
- The capacity to work independently in a dynamic environment with intermediate/ senior support, as appropriate
- Strong attention to detail and accuracy, coupled with enthusiasm for continual improvement
- An interest in supporting government agencies, proponents and/or construction contractors in the building of projects and regulatory compliance of such projects
- Willingness to travel for field work in remote locations and/or between offices
- The ability to safely conduct fieldwork in remote locations for extended periods (e.g., two weeks), walk long distances and operate OHVs under a variety of weather conditions
